ABSTRACT

This booklet presents statistical graphs and tables on Iowa's state of education. The report centers on the state's dropouts and graduates. The rates for fiscal 1992 secondary school dropouts include comparisons for the state, number of students enrolled, 16 different merged areas, by sex, and by grade distribution. Also included are K-12 enrollment categories showing the grade distribution of dropouts broken down by student population. A profile is provided of the percentage of total state enrollment versus the percentage of total dropouts with a focus on the grade distribution of dropouts by ethnicity and by merged area. The reader may also view county by county dropout statistics as well as a 23 year composite, 1970-1992, for the state by grades. The categories in the graduate follow-ups for 1991-1992 are broken down by the type of institution/program the graduate now attends, the type of employment, and other miscellaneous activities. These data are also structured by student populations and merged areas. The report concludes with a composite of graduates' primary status for the past 23 years. (RJM)
